

Whitmoor (N Gauge 12ft x 2ft 6ins)

Whitmoor is Astolat's latest N gauge layout. Now completed with full scenery, there are lights in houses and the engine shed as well as on the station platform, a fully automatic turntable and lots of other details to look at on this impressive layout.

The layout has a continuous run, via a fiddle yard, on a double main line through the station. Additional terminal platforms at one end of the station are intended for branch line traffic (the branch line being the old Chacombe, Priorsfield & Whitmoor Railway) and suburban traffic to the "big city". The layout includes a goods yard and locomotive depot.

There is a village over the tunnel at one end with fully detailed buildings and gardens, and the industrial area at the opposite end of the layout.

Trackplan

Layout size: 12ft x 2ft 6ins Operating area required: 12ft x 5ft plus access

Requirements:

- Tables – 1 (for stock)
- Chairs - 2
